

*PYTHON*

*PART-3*

# *In this chapter*

- ✓ **Introduction**
- ✓ **Understanding functions**
- ✓ **Defining functions in Python**
- ✓ **Follow of Execution in a function call**
- ✓ **Passing parameters**
- ✓ **Returning values from functions**
- ✓ **Composition Scope of variables**

# *Introduction*

# *Introduction*

- In this chapter, we shall talk about functions, especially, how a function works:
- how you can create your own functions in Python : and how you can use the functions created by you

*NOTE : A function is A sub program that apps on data and often a value*
